### LOCATION:

Elephant Hill is located 7 miles Northeast of downtown Los Angeles in the 4.1 square mile community of El Sereno.

# **VICINITY MAP:**

## **Neighboring communities:**

Alhambra, Boyle Heights, East Los Angeles, Lincoln Heights, Montecito Heights, Monterey Park and South Pasadena. Council District 14 (Los Angeles)

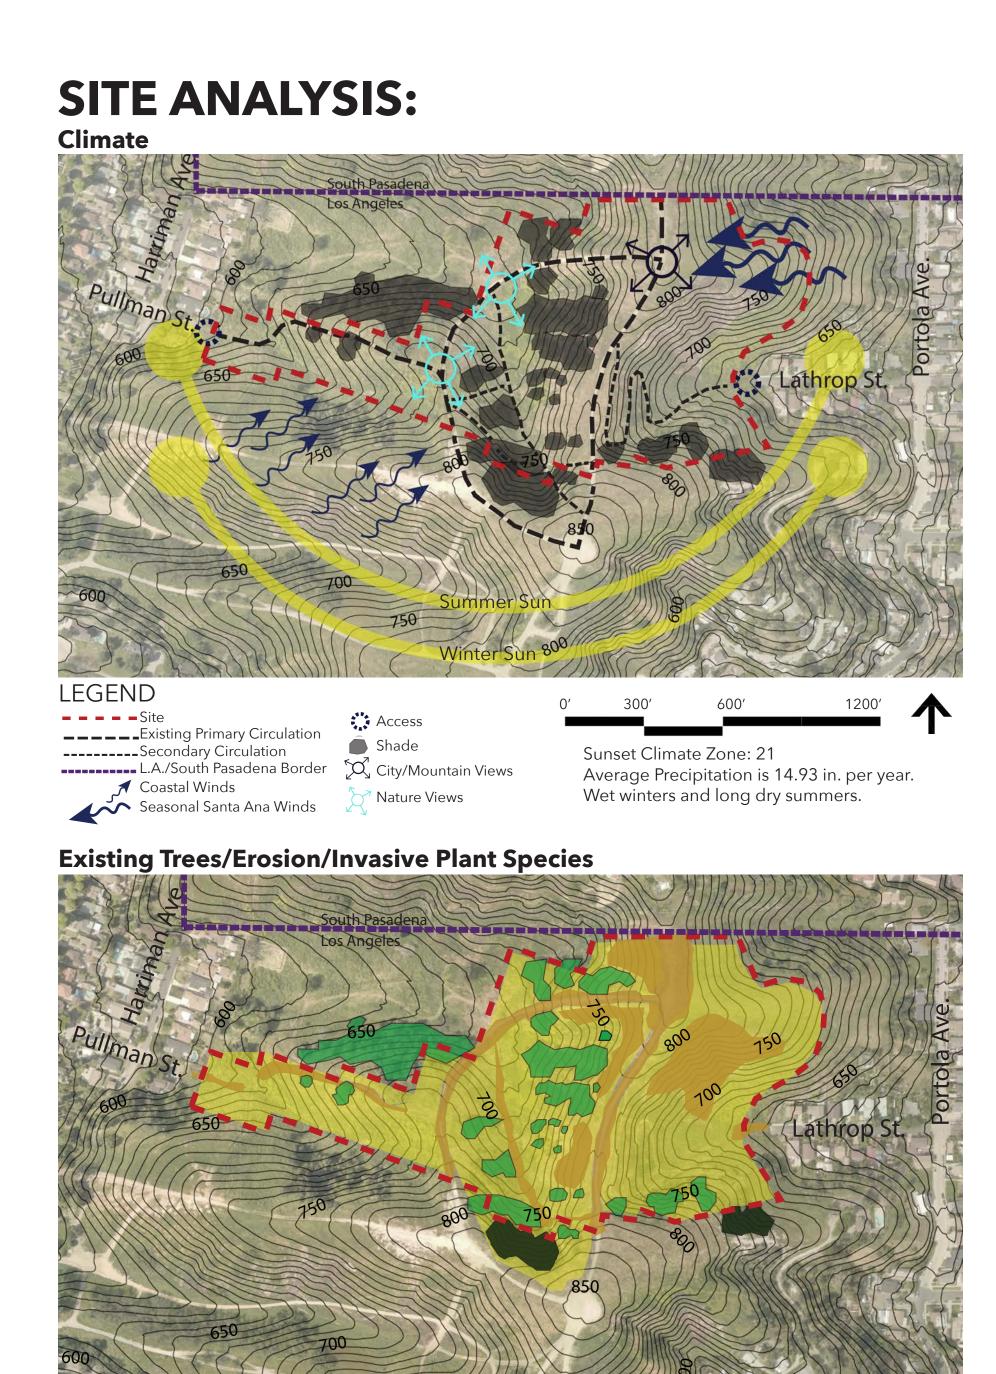

### **STATEMENT:**

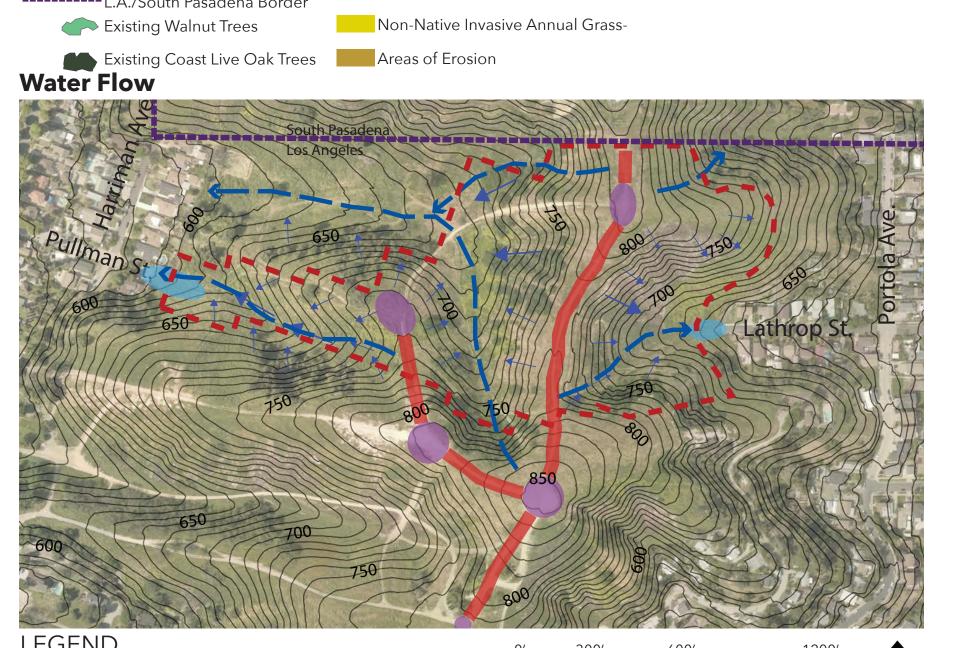

This project will transform Elephant Hill, an underdeveloped and neglected natural area, into a passive recreational park through the use of landscape architectural and restoration principles. The proposed park will provide opportunities for connection and recreation and will also re-establish a more native landscape that will reduce erosion and fire risk and provide wildlife habitat.

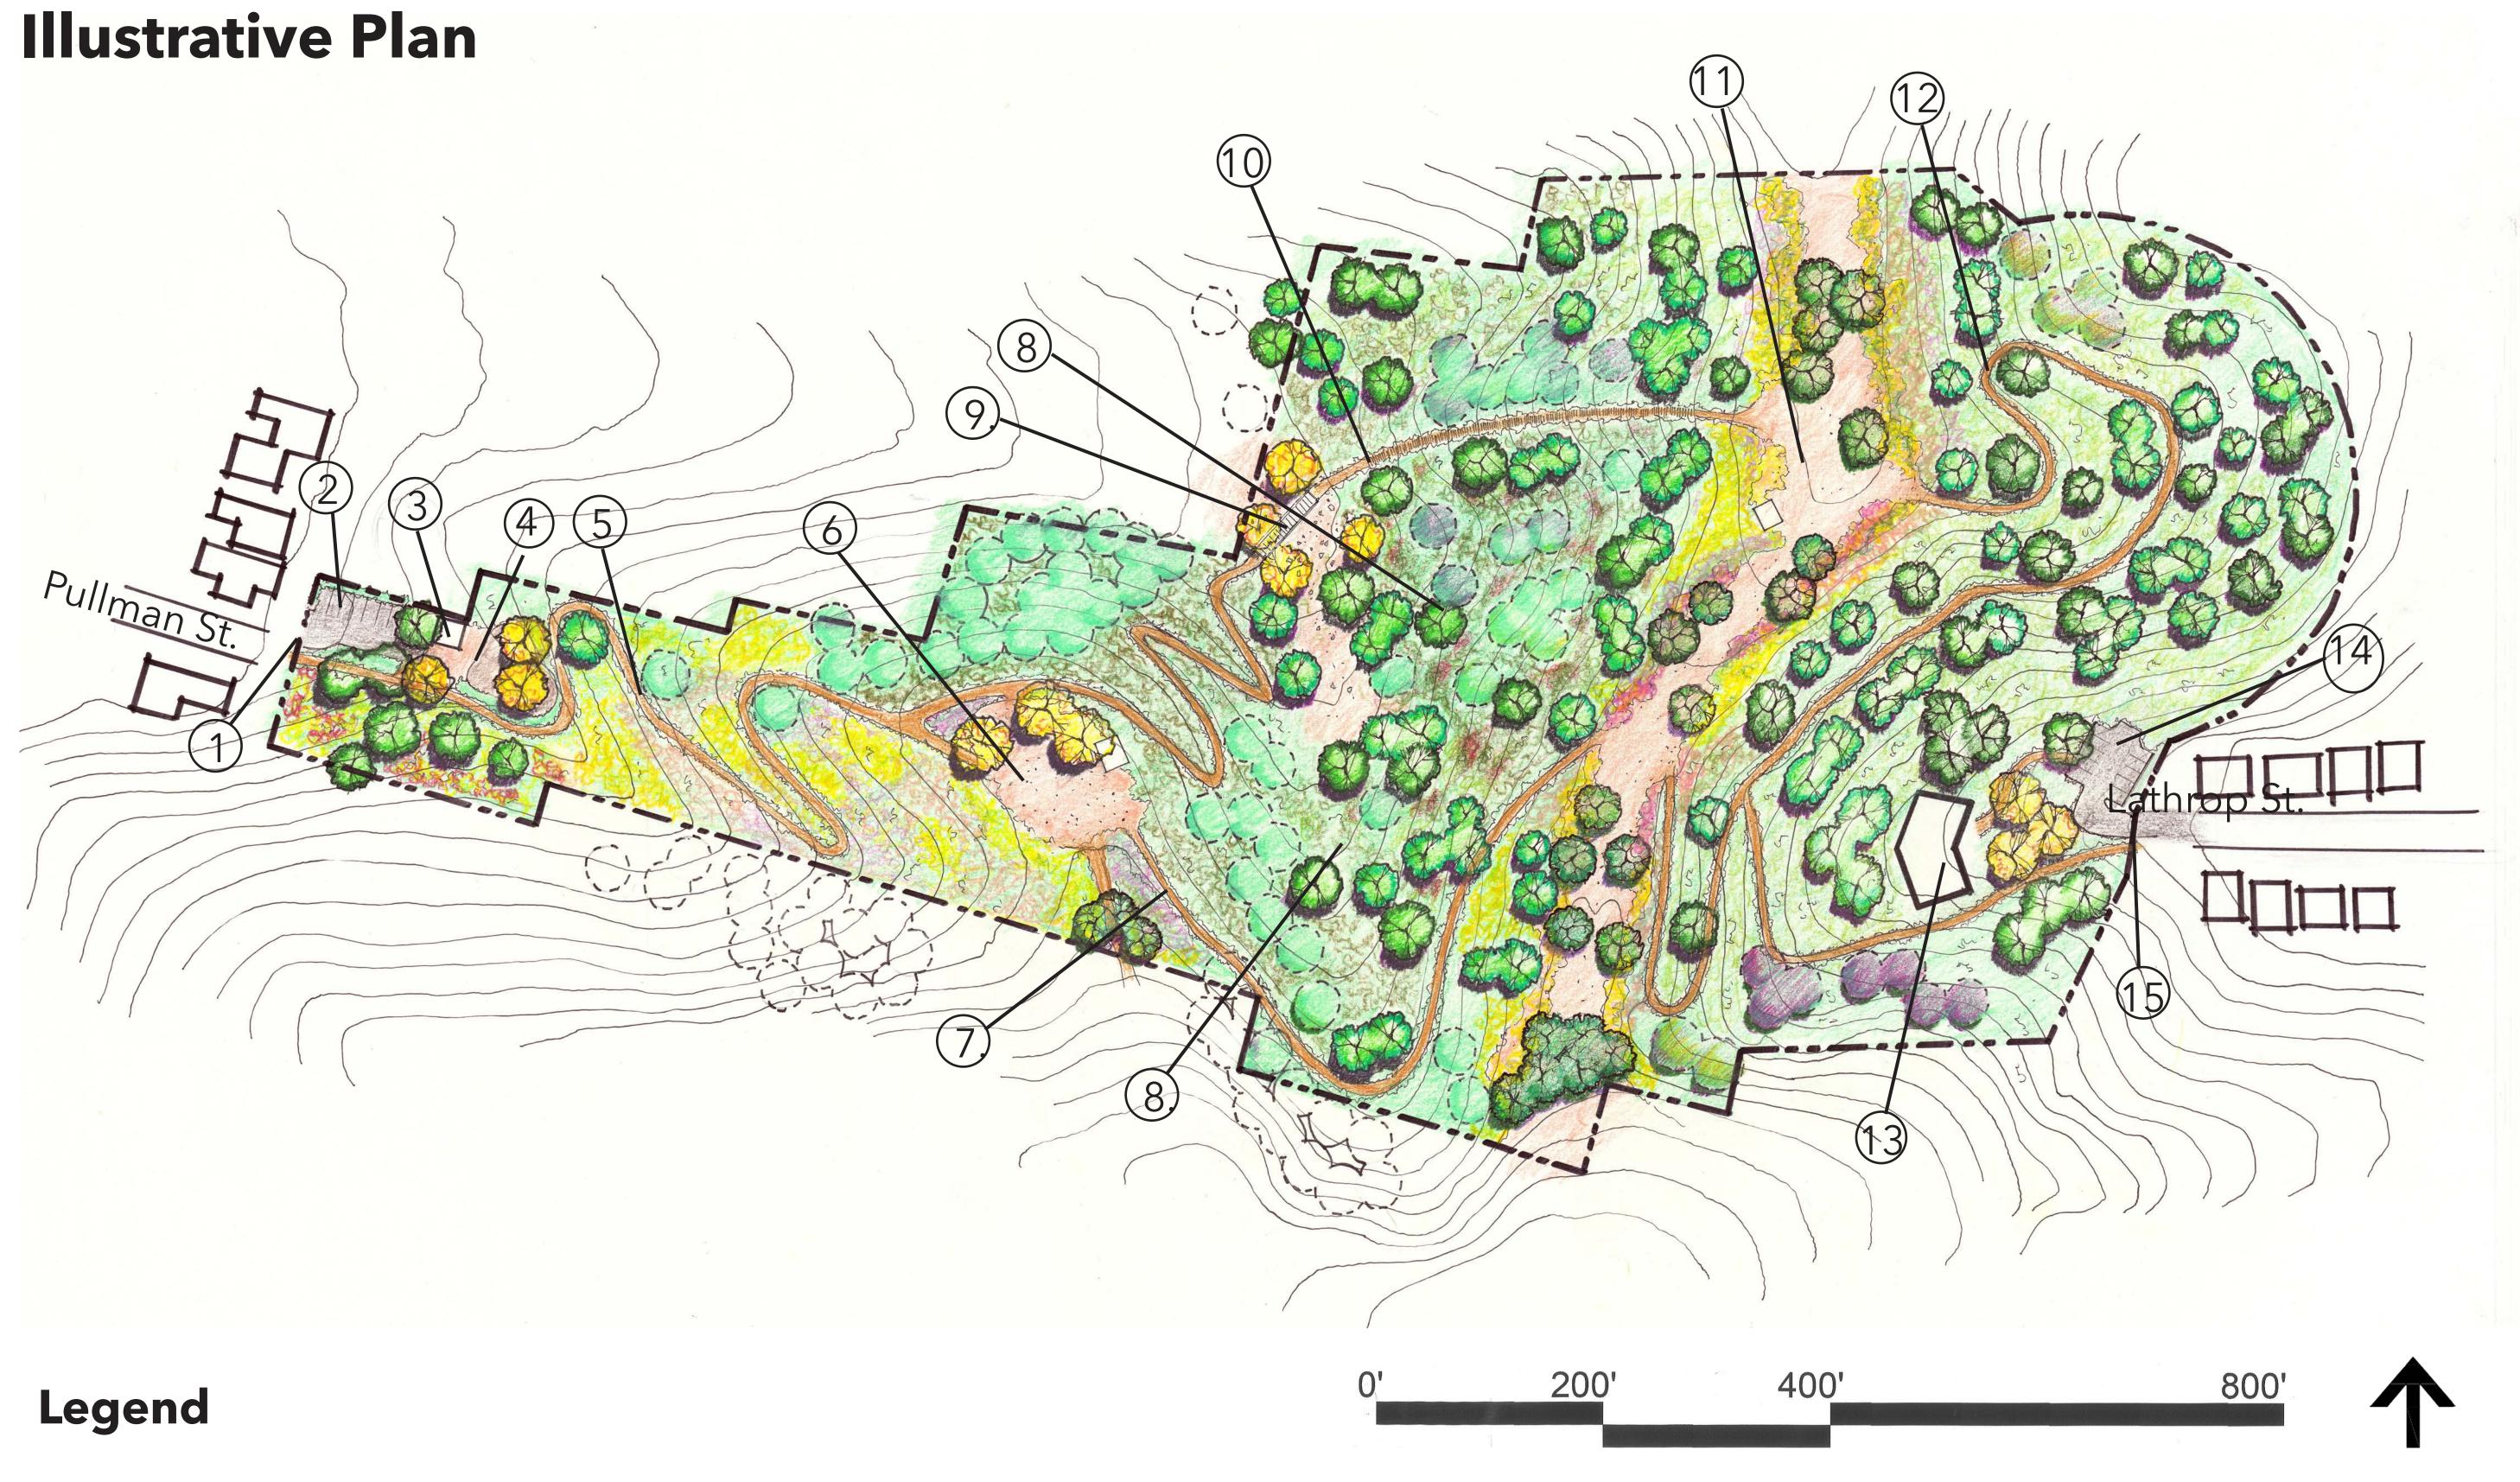

### **GOALS AND OBJECTIVES:**

- 1. Create a Passive Regional Open Space that is **safe** and **accessible**.
- Develop **trails** on Elephant Hill in order to make the site walkable and accessible.
- Develop a park environment that people feel **safe** to be in by providing wayfinding devices and **signage**, informing visitors of the site, it's history, and the importance of its wildlife community.
- 2. **Restore** and **preserve** Elephant Hill, one of the last and largest natural areas in northeast Los Angeles.
- Restoring and enhancing sustainable plant communities on the site such as coastal sage scrub and walnut woodland in order to keep intact the wild **nature** people can enjoy and experience.
- 3. To create a **sustainable** environment that connects people to the natural world.
- Provide education and recreation for the people in the surrounding communities while also incorporating protection and preservation of wildlife habitat
