THE BIRD'S NEST

DESIGN GOALS

Connect family with the natural world
Provide food water and shelter for birds
Offer refuge for family and bird families to grow

DESIGN NARRATIVE

The design facilitates the **family** with a young daughter to connect with the natural world with an emphasis on **birds**.

Birds are welcome visitors and residents of this landscape and bring this family much **joy and peace**.

We are able to provide everything the birds need with this yard including **food water and shelter** for all kinds of birds from resident hummingbirds to migratory birds.

The plants in the design provide for the diet of adult birds as well as the **nestling's** almost exclusively caterpillar diet.
